

INTERNAL OPERATING PLAN • OWNER: B. AMECHI • PREPARED AUGUST 2026 • V1 FOR BOARD SIGN-OFF

THE SUPERMIND CREATOR NETWORK

One business unit, two engines. Engine one: an always-on **affiliate program** on WHOP that pays real people to sell Supermind every day. Engine two: a **creator gift-box program** that turns the marketing budget into product, relationships and content instead of platform ad spend. Amechi runs it as a P&L with 8 hours a week of staff support. This document is the full game plan: setup, launch, staffing directives, budget, and the numbers it gets judged on.

SUBSCRIBER NORTH STAR

15

ACTIVE AFFILIATES BY DAY 90

\$1,500

MONTHLY ATTRIBUTED REV TARGET

8 hrs

STAFF SUPPORT / WEEK

\$500 to a creator beats \$500 to Facebook.

Paid platforms rent attention that disappears when the spend stops. This machine buys assets that compound: creators who stay in the network, content that stays on the internet, members who stay subscribed. The framing that holds it all together is the one Keys named: **Supermind is a private members club that is not a private members club.** The subscription is the membership. The affiliates are the members who evangelize. The gift box is the invitation.

- **Proof it already works:** one affiliate (Reuben) earns roughly \$500/month posting the product unassisted, with zero program support. 12 new affiliate inquiries came out of Invest Fest and were accepted. The demand exists; the system does not — yet.
- **Why WHOP:** tracking links and codes per affiliate, automated commission payouts, metric-threshold bonuses, a leaderboard, an orientation course module, community chat, and a discovery marketplace where creators find brands — the whole back office in one tool, no spreadsheets.
- **Fit with the budget law:** Sakara's rule holds marketing at 5–10% of revenue. At ~\$12k/month that is \$600–\$1,200. This plan runs its core loop at ~\$1,000/month, flexing with revenue.

THE TWO ENGINES, SIDE BY SIDE

	AFFILIATE ARMY (WHOP)	CREATOR GIFT-BOX PROGRAM
Who	Fans, customers, micro-creators — anyone	Curated names: athletes, artists, wellness leaders, community anchors
They get	Commission + threshold bonuses + tier perks	A produced gift box, a handwritten note from Keys, membership card, creative freedom
We get	Daily distributed selling + UGC volume	Organic reach into real audiences + collab posts + ad-ready content + future affiliates
Cost basis	Pure margin share — \$0 up front	~\$35–50 landed per box + selective paid collabs
Cadence	Always on	Monthly tranches of 15–25 boxes

The WHOP playbook — 30 days to a running program.

WEEK	ACTIONS	DONE MEANS
W1 • Build	WHOP store configured: affiliate product page, per-affiliate tracking links + Shopify discount codes, commission set (T0 10% / T1 15% / T2 20%), content-rewards rules (per-verified-view bonus, capped), leaderboard on, community chat opened. Asset folder linked inside: logos, b-roll, product shots, the do/don't sheet, caption starters. Record the orientation once — 20 minutes: products, story, approved content types, what gets reposted, exactly how and when payouts hit.	A stranger can join, learn, get a link and get paid without talking to us
W2 • Seed	Accept and onboard the 12 Invest Fest inquiries. Feature Reuben as the case study ("he makes \$500/month — here's how"). Email the full customer list with the invite: members sell the club. Post the program on WHOP's discovery marketplace.	20+ enrolled, 5+ posted
W3 • Ignite	First leaderboard published in the community. Personal outreach to the top 10% — the outliers carry every affiliate program. First collab posts between affiliate content and the brand pages.	First commission payouts queued
W4 • Prove	First payouts land — screenshot, celebrate, repost. "First payout" content is the best recruiting ad the program will ever have. Publish month-one numbers to the team scoreboard. Open TikTok Shop affiliate marketplace in parallel.	Month-one report: enrolled / active / attributed revenue / payout total

T0

Fan

Anyone. 10% code, personal discount. Costs nothing — pure margin share.

T1

Seeded

Gift-box recipients who post. Free bundle + 15% commission.

T2

Partner

4+ posts/month, consistent quality. \$250/mo + 20% + collab posts. Cap 2–4 people.

T3

Flagship

Campaign faces. \$500/collab + the docu-profile treatment + top payout table.

RULES AND GUARDRAILS

- **FTC disclosure required** on every affiliate post — written into orientation and the do/don't sheet.
- **Code hygiene:** one code per person, no coupon-site leakage, WHOP handles attribution.
- **Brand-safe lane:** affiliates follow the light "field mode" content rules, not the full World Bible feed law — volume is their job, the flagship grid is ours.
- **No health claims:** affiliates speak to taste, ritual and their own experience. The claims list from the World Bible governs.

COMMUNITY LAYER

The army lives in the WHOP community space. Hike attendees funnel into the Zion community (Antoine manages notifications) – every hike, bonfire and event feeds new members into the same pipe: attend → join the community → subscribe (membership) → affiliate (member who sells). One flow, told as the club.

The gift-box program — the invitation.

THE BOX

- **Contents:** coffee + chocolate + mug or vessel, the membership card, a printed World card (the brand's principles and the creative invitation), and the centerpiece — **a handwritten note from Keys**, personal to the recipient.
- **Landed cost:** ~\$35–50 per box at product cost. Tranches of 15–25 monthly.
- **The invitation, not a gift:** the card asks them to create in THEIR style with simple guidance — we are not scripting them; we are inviting them into a world we think they already live in.

THE FIVE CONTENT LAYERS — CONTENT AT EVERY STEP

LAYER	WHAT WE CAPTURE
1 • The making	Keys writing the notes and packing boxes on camera, talking the intentionality of the brand and who he's inviting. This is founder-story content before one box ships.
2 • The strategy, documented	Build-in-public: the list, the letters, the send-out. The audience watches the club being assembled.
3 • They create	Recipients post in their own voice. Their post is the campaign.
4 • The collaboration	Best content becomes collab posts — one post, two audiences. Winners get boosted as paid with permission.
5 • The docu-profile	Top recipients get the David athlete-reel treatment: a produced profile of their discipline, product as fuel. These are the ads.

THE TARGET LIST — HOW IT GETS BUILT

- **Archetypes:** in-shape, put-together Black and brown men and women 18–40 living the lifestyle — athletes and trainers (the Mike Rashid type), artists (the Vic Mensa lane — his collab posts are live now), wellness practitioners, community builders (Ebony Beach Club), hike leaders, EYL-network creators.
- **Sources:** Keys' asset/contact list, Invest Fest contacts, mastermind practitioners, hike regulars, existing top customers (call the top 20 — already a team action item).
- **Qualification:** real engagement over follower count; posts that already look like the world; would plausibly say yes to a hike.

THE ASK FLOW

STEP	PLAY
1	Warm DM/intro (from Keys or Amechi depending on relationship): "We're building something — want to send you the box. No strings."
2	Box ships with the note + invitation card + their affiliate code pre-made.
3	Follow-up at day 7: did it land, what did they think. No content demand — the invitation does the work.
4	When they post: repost, collab request, usage-rights ask for paid amplification, and the tier-up conversation.

SUCCESS MATH, HONESTLY

25 boxes ≈ \$1,000–1,250. A 30% post rate = 7–8 organic placements into real audiences plus reusable creative — against what \$1,000 of cold Meta spend buys a brand with no proven CAC, this wins on every axis that compounds. Target: 30% post rate, 5 recipients converted to active affiliates per tranche, 2 collab posts per month.

Who does what — inside 8 staff-hours a week.

AMECHI — GENERAL MANAGER (THE OWNER)

- Owns the P&L, the strategy, the target list, and the Keys relationship (notes, packing shoots, approvals).
- Personal outreach to the top 10% of affiliates and all gift-box names.
- Runs the weekly program meeting; publishes the Monday scoreboard line.
- Produces the docu-profiles and the layer-1/layer-2 content.
- Escalates only two things to the board: budget changes and tier-2+ paid commitments.

THE 8 STAFF HOURS, ALLOCATED

HOURS	WORK	WHO
3.0	WHOP ops: approvals, code creation, payout runs, leaderboard update, marketplace listing upkeep	Selena
2.0	Box logistics: pack list, shipping, tracking sheet, restock flags to Mariah	Pam / Selena
2.0	Creator inbox: replies, day-7 follow-ups, usage-rights asks, routing hot leads to Amechi	Pam
1.0	KPI sheet + weekly one-page report (enrolled, active, revenue, payouts, boxes, posts)	Selena

Everything else is automated by WHOP or owned by Amechi. If the program grows past 8 hours, the growth pays for the hours — that is the deal with the board.

SUPPORTING DIRECTIVES — ONE LINE EACH

PERSON	DIRECTIVE
Steve	Repost pipeline: 1 affiliate/creator repost per day on the brand pages, collab posts confirmed Fridays, AI UGC batch weekly in field-mode rules.
Antoine	Zion community: hike attendees in, event notifications out, membership framing consistent.
Keys	One packing/notes session per month on camera. Approve each tranche list. One collab post per week maximum — the dial, not the engine.
Mariah	Inventory allocation per tranche, budget release on the monthly report, Shopify code hookups.

WEEKLY RHYTHM

DAY	BEAT
Mon	Scoreboard line published. Payout run. Leaderboard update.
Tue	Program meeting inside the team Tuesday call — 15 minutes, numbers first.
Wed	Boxes packed/shipped. Follow-ups sent.
Fri	Collab posts confirmed. Top-10% outreach. Next tranche list drafted.

BUDGET — MONTHLY, BOARD-APPROVED ONCE

LINE	LEAN	STANDARD
Gift boxes (product cost)	\$500 (12–15)	\$1,000 (25)
Partner creators (T2)	\$250 (1)	\$500 (2)
Payout float + tools	\$100	\$150
Total	\$850	\$1,650

What this gets judged on.

Metric	Day 30	Day 60	Day 90
Affiliates enrolled / active-posting	20 / 5	35 / 10	50 / 15
Attributed monthly revenue	\$400	\$900	\$1,500
Boxes shipped / post rate	15 / 30%	40 / 30%	65 / 35%
Collab posts live	2	5	8
UGC pieces banked / week	3	6	10
Subscribers (the membership)	Tracked against the 1,000-subscriber north star — every affiliate code and box card carries the subscribe offer.		

Ninety days from launch, this either shows revenue that exists without any single face — or it shows exactly where the model breaks, for under \$5,000 all-in. Either answer is worth more than the same money burned on cold ads.
